14 FEBRUARY 2002

Dear Dr Elliot Shevel and Staff

I would just like to put into a few words what you have done for me since I have had my PMA Plate. I have had the plate since January 2001.

Before I had the Plate, every morning when I got up I would worry should I get a Migraine during the day that I would not be able to carry out my duty, because I would be out of action and this was a problem because I do hold a Senior Management position with my company and do have pre-arranged appointments that I need to attend to.

I have suffered all my life with terrible migraines which used to affect me two to three times a month. I had to take sleeping tablets to knock me out for at least ten to twelve hours and in some cases would end up in hospital. In January last year I had such a severe migraine that I was hospitalized for two days. My boss came to visit me in hospital and said that this is enough. He immediately made an appointment for me with the Headache Clinic. I went through all the tests and was given the PMA Plate, which I have been wearing 90% of the time. Since the time that I have been wearing the PMA Plate I have only had two headaches, for which I did not have to take any sleeping tablets at all.

I would therefore Thank The Headache Clinic for the change that this has brought to my life.

Regards

GEORGE GOUVEIA
