THE MANAGER
HEADACHE CLINIC

PROGRESS REPORT

This serves to inform your institution that since I attended a treatment at your clinic my headache problem has tremendously improved. The device has done a good job. When for the first time I was given the device I thought it was something which does not has a lot to do. I even thought I had just spend my money for nothing but instead I was just fooling myself. I use to have headache twice or thrice a week and consulted to different GPs with little improvement but for now I am not experiencing that problem any even after stopping using the device. Lastly I would like to congratulate the entire employees of your institution for their care and respect. May your institution keep up the good work which you offer to the entire patients who seek help.

Yours truly,
Kgoathe A.M
