

I would like to thank Headache Clinic, doctors and all the staff personnels for their quality service they provide to their clients.

In the past, i.e. last year 2001 I suffered a severe headache. I went to my family practitioner who saw that he couldn't help me, and without wasting time he referred me to Headache Clinic.

My head was examined thoroughly starting from all nerves, skull and brain scanning. I was then provided with a gun as a medication. At first I thought it as a joke, but within few days my head felt like healing.

Sometimes I would forget it at home when going to work. I'll feel my head becoming painful now and then. I will then force myself back home to fetch it, and from that time I made it certain that it remains in my person.

My headache is totally healed. Thanks to the Headache Clinic. Keep up the good work.

Yours
