DEAR DOCTOR SHAVEL AND STAFF

I would like to congratulate you on a job very well done !

Five years ago, when my daughter was 10 years old, she started to have these severe headaches. She described them as though someone was bashing her head against the wall, or instead of chopping wood; they were chopping her head with an axe.

We went to different doctors and tried every medication we could get, but she couldn't get better. Someone even told us to go to an "inyanga" (witchdoctor) and they gave her treatment. At some stage the "inyanga" told us to cook some medicines and mix them with tripe.

One "inyanga" told us to change her name because maybe the name that we are using is not appropriate, and that might be the cause.

In January this year I saw an advertisement in the newspaper about your clinic, and I thought that might be the answer to our prayers. We came, and she got the "plate", and it worked marvellously. Now there is a major improvement (about 95%) and we are very glad for that. I am really pleased with your excellent work and also your friendly staff.

KEEP UP THE GOOD WORK !!

MRS GLADYS M. MASEMOLA (PRETORIA)
