Attention: Jolene

Last year September I was attacked by a terrible headache that made me give up my life. I got an advice from one of my friend's sister to go and seek help from the Headache Clinic.

After three weeks of the most severe non-stop headache, I eventually went there.

After thorough check of my headache problem, it was decided that I use the PMA system (the plate). In five minutes of inserting that plate I immediately experienced the different life -**living free from the headache again after a very long time.**

Since I have started using the plate, which was in October last year, **I have never experienced a headache anymore.**

Thanks to the Headache Clinic!
