Dear Doctor,

Patient: Mrs E.S. West:

Thank you very much indeed for the detailed report you sent to me regarding this patient's problem.

I have spoken to her since commencement of your treatment. She is overwhelmed by the success you have obtained.

I notice that you diagnosed a pathological occlusion (occlusal interferences) but do not indicate that you are planning to remove the interferences. Is my assumption correct?

Your success with the little ORTHOSIS plate, the thinking behind it, and your conservative approach appeals to me.

I have been interested in treating patients with PDS and have presented lectures overseas and in SA on this topic.

I would like to meet you one day that we can discuss this very interesting topic further.

Yours sincerely,

Hannes Nel
