Dear Joalene

My name is Agnes Tlaka. A friend referred me to the clinic.

I have been suffering from migraine headache since the age of 12. That is 26 years ago.

I visited the clinic for the first time in October 2001, and to my amazement it worked wonders for me.

The personnel there, from the receptionist to the specialist are such wonderful and caring people. They are professionals.

To be quite honest, I did not trust the PMA I was given as a remedy for my headache, but I used it. I think it was only adjusted twice or thrice to fit in properly and thereafter I never had a problem.

I think my headache has been cured about 75 to 80%. I hardly take painkillers /tablets anymore. I hardly use the PMA anymore. Only when I feel a slight, I mean a slight headache.

I am so grateful that I have finally found cure for my headache. Thanks to the clinic.

Keep up the good work.

May God Bless You All At The Clinic.

Yours truly,

Agnes Tlaka
