

Translation:

Headache Clinic

Dr Stuebel,

I feel obligated to write this letter. It has been quite a few days that Annette has said she does not have any more headaches. It is unbelievable!

To good to be true.

Only her, and myself, and her GP (and the pharmacist) know what hell she's been through.

It is a measure for her to prove many doctors, psychiatrists and psychologists wrong. They believed she was addicted to painkillers and that the headaches were psychological so as to get hold of the painkillers.

Be assured that we will spread your name far and wide (Tvl and Namibia) as well as recommend your clinic.

In Windhoek alone, many doctors know about her headaches, and I will ensure they know it has been reserved and by whom this has been done.

Thank you
(H.L. VREY)
